finance fictions takes the measure of what it means to live in a world ruled by high finance by examining the tension between psychosis and realism that plays out in the contemporary finance novel when the things traded at the center of the economy cease to be things at all but highly abstracted speculations how do we come to see the real what sorts of narrative can accurately approach the actual workings of a neoliberal economy marked by accelerating cycles of market crashes economic and political crisis and austerity revisiting such twentieth century classics of the genre as tom wolfe s bonfire of the vanities and bret easton ellis s american psycho de boever argues that the twenty first century is witnessing the birth of a new kind of realistic novel that can make sense of complex financial instruments like collateralized debt obligations credit default swaps and digital algorithms operating at speeds faster than what human beings or computers can record if in 1989 wolfe could still urge novelists to work harder to tame the billion footed beast of reality today s economic reality confronts us with a difference that is qualitative rather than quantitative a new financial ontology requiring new modes of thinking and writing mobilizing the philosophical thought of quentin meillassoux in the close reading of finance novels by robert harris michel houellebecq ben lerner and less well known works of conceptual writing such as mathew timmons credit finance fictions argues that realism is in for a speculative update if it wants to take on the contemporary economy an if whose implications turn out to be deeply political part literary study and part philosophical inquiry finance fictions seeks to contribute to a new mindset for creative and critical work on finance in the twenty first century

pocos novelistas contemporáneos han analizado la cultura americana con el detalle con el que lo ha hecho richard ford en su trilogía sobre frank bascombe the sportswriter independence day y the lay of the land un tríptico sobre la idiosincrasia de la sociedad norteamericana expuesto por uno de los narradores más meticulosos de la nación este libro se aventura en un territorio sin explorar revelando cómo el singular sabor americano de las novelas de frank bascombe también surge de escenarios peculiares y de los personajes marginales que proponen modelos de identidad alternativos esta obra redescubre la esencia del principal proyecto novelístico de ford desvelándolo como una fuente infinita de percepciones para cualquier lector interesado en la gente los mitos y las narrativas que construyen el ser americano

this dissertation aims to provide a comprehensive overview of the taxation of investment derivatives and the relationship between the derivatives and the accrual and realization methods investment derivatives such as convertible bonds include an initial investment and a derivative an option to buy or sell or to participate in the value movements of some underlying property the principal focus of this study is on three universal tax issues namely valuation timing and the taxation of unrealized gains as a common principle interest income and capital

gains are treated more similarly in corporate taxation than in individual taxation moreover the taxation of financial instruments is currently in a turn around phase in several countries not least because of the implementation of the ifrs rules in accounting and the related fair value principle the obligation to use fair values in accounting apparently motivates tax legislators to strive to use the same principles in taxation as well the comparative method plays a major role in this study by examining the tax legislations and the tax practices of different countries an in depth analysis of the similarities and differences of tax laws and practices in the united states the united kingdom germany finland and sweden is provided this is of particular interest as the underlying components single and often specified financial derivatives are basically identical while this study does not deal with individual tax treaties or bilateral transactions the oecd model is scrutinized in order to highlight the underlying principles of the given recommendations especially with respect to interest income and capital gains due to the increasing importance of ifrs rules in accounting the study is not limited to tax law but also looks at issues from the perspective of finance accounting and economics

ever felt like inflation is messing with your head you re not alone in the price of mind we dive deep into how rising prices affect not just our wallets but our mental well being we re talking anxiety panic buying the struggle to make ends meet and how inflation fuels social unrest and political polarization from the gig economy grind to the anxieties of young people this book explores the hidden mental costs of inflation but it s not all doom and gloom the price of mind also explores the resilience of the human spirit we look at how communities come together in tough times the power of digital connections and the potential of the metaverse and ai to offer solutions this book goes beyond typical economic analyses to offer a fresh perspective on inflation s impact giving you insights you won t find anywhere else

what is economics missing link recent economic crises have had a devastating impact on society worryingly they gravely risked a collapse of the financial system these crises also painfully revealed economics blind spots crucially economics is not an innocent bystander but central to the problem in this pioneering book patrick schotanus explains that economics mechanical worldview is the ontological error which leads to flawed thinking and faulty practices the market mind hypothesis mmh thus calls it mechanical economics it not only erroneously views but also dangerously treats the economy as a machine the market as an automaton and its agents as robots inspired by heterodox economic and leading cognitive thinkers this book offers an alternative paradigm central to mmh s

psychophysical worldview is the fact that consumers investors and other participants are conscious beings and that their minds extension makes consciousness a reality in markets exemplified by market mood specifically denial of the complex mind matter exchanges as the essence of markets means the extended mind body problem is economics elephant in the room the book argues that if mechanical economics is the answer we have been asking the wrong questions moreover we will not solve our economic predicaments by doubling down on the assumption of rationality nor by identifying yet another behavioural bias instead scholars and students of economics and finance as well as finance practitioners need to investigate through cognitive economics the deep links between markets and minds to better understand both with a foreword by investment strategist russell napier an intermezzo by neuroscientist and complexity pioneer scott kelso and an afterword by 4e cognition philosopher julian kiverstein

dr blake provides an up to date analysis of the historical development of pensions the characteristics of current pension schemes and the investment behaviour and performance of pension funds he explains how the government has influenced the development of private schemes and examines the full range of pension schemes operating in the uk today some important public policy issues facing pension schemes are investigated the demographic time bomb the future of tax benefits enjoyed by schemes the ownership of pension assets and surpluses and the differential treatment of men and women the author explores the consequences of pension fund behaviour and performance for capital markets developments taking place in europe and the us are also examined

great britain is ageing but doesn't seem to know it despite numerous warnings from official reports the government has ignored or neglected the car crashes ahead our health social care services our pensions system and our housing provision are all in crisis whilst almost every family now faces the dilemma of ageing parents and boomerang children unable to leave home yet it doesn't have to be all doom grey gloom in this detailed new book martin slattery seeks to show there is a silver side to this age revolution the potential for a new age manifesto that might propel ageing up the political agenda create a new intergenerational social contract and force the government to plan ahead for the 100 year life now facing over a third of all children born today if the japanese the scandinavians and the bolivians can do it why not great britain we owe that to our children and to the generations ahead welcome to the ageing world of the 21st century
